

PATENT  
0175-0284P

IN THE U.S. PATENT AND TRADEMARK OFFICE

Applicant: Scott WILLIAMS et al.  
Appl. No.: 09/637,082 Group: 1773  
Filed: August 11, 2000 Examiner: Unknown  
For: HEAT-SETTING LABEL SHEET

PRELIMINARY AMENDMENT

Assistant Commissioner of Patent  
Washington, D.C. 20231

July 20, 2001

Sir:

The following preliminary amendments and remarks are respectfully submitted in connection with the above-identified application.

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 51, line 16 and ending on page 52, line 6, with the following rewritten paragraph:

--To transfer the image, the heat-setting label sheet is imaged by, for example, an ink jet printer. The heat sealing material (or label portion) is peeled away from the base and placed on the receptor element. A heating device (i.e., a hand iron or heat press) is used to apply heat and pressure to the support which in turn activates the heat-sealing material and the label adheres to the receptor. The temperature range of the hand iron is generally in the range of 110 to 220°C with about 190°C
